RE: B448 Facility Disposition RSOP Notification

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed your September 14, 2004 letter notifying us that the Facility Disposition RSOP will be utilized during the demolition of Building 448. We hereby agree that B448 may be demolished utilizing the Facility Disposition RSOP.

However, as discussed in our PDSR approval letter, since there are areas of the slab that may be greater than 3 feet below future grade, and may remain, the location and level of beryllium contamination above 0.2 ug/100cm2 that may have been fixed on the remaining concrete must be properly documented in the Closeout Report. Also, based on the future depth of the slab, at least some of the slab is expected to be removed and concrete with beryllium contamination above 0.2 ug/100cm2 prior to application of fixative cannot be recycled and must be sent offsite for proper disposal.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328.

Sincerely.
